### INSTRUCTIONS TO FORM RANDOM PATTERN

Primary Color: Black with White Veining

Adhesive:

Inside: Thin set mortar recommended

Outside: Flexible latex based mortar recommended

Application: Walls/Fireplace/Backsplash

Usage: Interior/Exterior Rated In all areas

Weight: 8 Lbs. per SF

Dimension (in): 2"X8", 2"X12", 3"X8",  
3"X12", 4"X8", 4"X12"

Basic Guidelines:

\*Each box has 6 sets of 6 pieces. Each set contains 1 ea. : 2x8, 2x12, 3x8, 3x12, 4x8, 4x12 with the thickness varying between 10mm and 20 mm.

We recommend laying out the pieces on the floor to ensure a random look.

Each line of the stack should remain constant in height through the length of the install. If starting a 2" row, the row should be continued with the 2" stone mixing the 8" and 12" lengths randomly, etc. The thickness of the stone will also vary between 10mm and 20mm randomly. This method is also used in setting the 3" and the 4" rows.

Laying out the pieces on the floor to check for a proper visual appeal is highly recommended.

This product is installed using standard installation methods for thinset adhesives. This product requires no grouting.
